74.1 Strategic Analyses for Research and Innovations

3

- Not all research is *relevant*
- For developing your research direction
 - Often, decisions have to be made about which way to go in research. Several general analysis for strategy can be used.
- For deriving an innovation
 - Out of a set of research results, it has to be decided, which one has be best chances to become a product and have success to be sold
- For defining the “minimal viable product” (MVP) of a startup
- [more material in course “Software Management (summer)”]

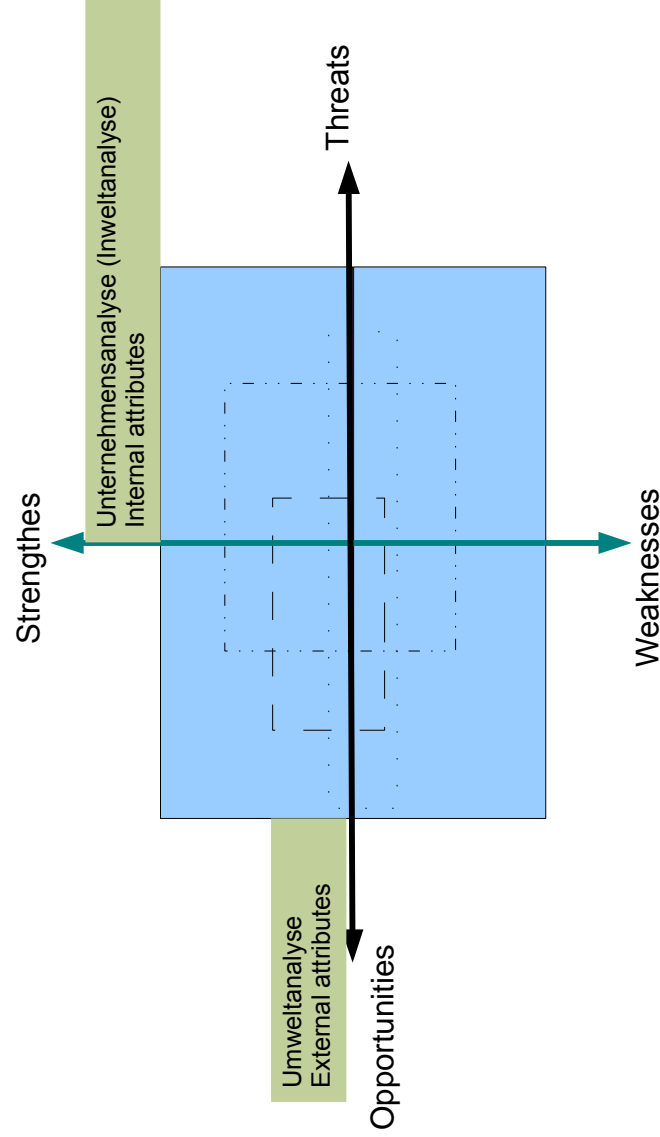

Academic Skills in Computer Science, © Prof. Uwe Alßmann

4

SWOT Analysis for Estimating Relevance of Your Idea

- ▶ SWOT is a 4-dimensional attribute analysis for the development of a strategy for of a project, research result, technology, service, or product [Albert Humphrey]
- ▶ For strategic decisions of your thesis and your research

Academic Skills in Computer Science, © Prof. Uwe Alßmann

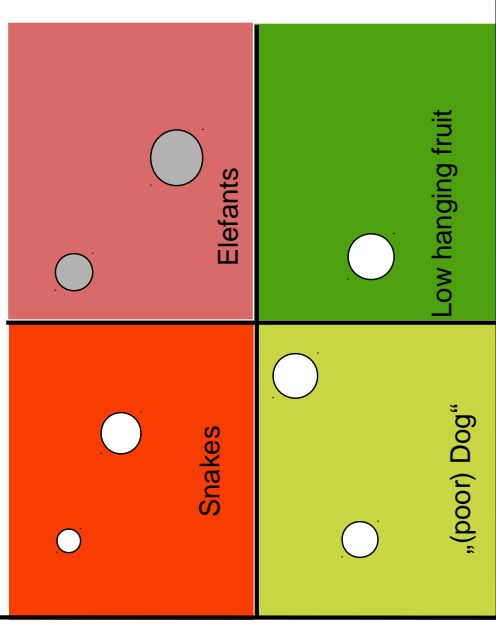

5

„Low Hanging Fruit“ Analysis (Cost-Utility Product)

- ▶ „low hanging fruit“-Analysis (Fruchtbarkeitsanalyse) analyses the set of possible research questions and results in a research portfolio
- ▶ The **Cost-Utility-Product** is:
 - **Cost-utility-product** = Win*Effort
- ▶ Most attractive are **“low hanging fruits” (Abstaubertore)**, because they bring bit win with low effort
- ▶ **Dogs** questions can be investigated, but will not lead to anything
- ▶ **Snakes** kill immediately – never do research on them!
- ▶ **Elefants** kill your research and your life on the long term if you are not careful. But they can also be rewarding

6

„KillerApp“ Analysis (Attractivity Portfolio)

- ▶ Die **“KillerApp“-Analysis** investigates for a product or a research paper
 - whether it is needed
 - whether it is comprehensible
- ▶ the **Attractivity Product** is a Utility-utility-product:
 - **Attractivity** = Need * Comprehensibility
- ▶ Most attractive papers, ideas, or projects are **“KillerApps”**, because they are easy to comprehend and useful for many

BCG-Box zur Marktanalyse als Attraktivitätsfaktor

7

- Die "BCG-Box" (growth-share matrix) analysiert die Menge aller aktiven Projekte auf (Boston Consulting Group)
 - Der **Marktfaktor** ist ein Nutzen-Nutzen-Attraktivitätsfaktor:
 - Marktfaktor** = Marktwachstum * Marktanteil
- Am attraktivsten sind Cash Cows
- Stars befinden sich noch in einem kleinen Markt, sind aber für Investitionen sehr attraktiv
- Dogs sollten auslaufen
- Question marks (problem children) können sich unter Investitionen zu Stars wandeln

[DecisionBook]

<http://de.wikipedia.org/wiki/BCG-Matrix>

http://en.wikipedia.org/wiki/Growth-share_matrix

8

Eisenhower's Urgency Analysis

8

- X4: important and important: do/realize immediately
- X3: important, but not important: do
- X2: not important, but urgent: delegate
- X1: not important, not urgent: ignore

8

Home Work

9

- ▶ Conduct a “low hanging fruit” analysis for the topic “Smart Grid”
 - find a killer app
 - find a golden technical app
- ▶ Conduct a “killer app analysis” for the topic Smart Grid
 - find a killer app
 - find a golden technical app

74.2 Innovation Engineering and Business Development

10

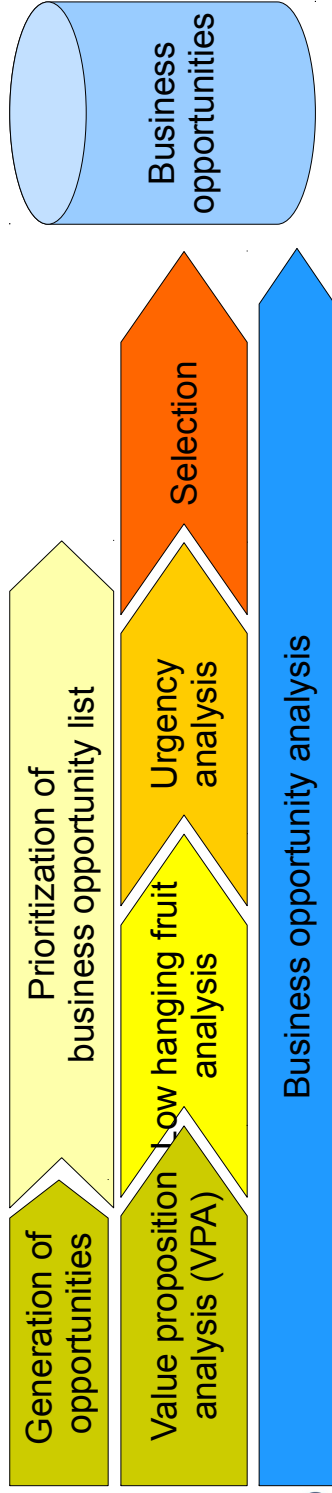

- .. from business opportunities to business cases.
- For startups
- For transfer.

74.2.1. Business Opportunity Analysis (BOA) for Products and Services (Innovation Analysis)

11

- ▶ How to find interesting problems or objectives of a customer?
 - Aspect-oriented problem analysis such as SWOT-BPOPP or UCEW-BPOPP
 - Value-Proposition Analysis (VPA), such as NABC
- ▶ This **business opportunity list (BOL)** contains prospective opportunities to solve problems for the customer, and earn money
 - It must be prioritized according with other 2-D or multi-criteria analysis methods
- ▶ *Low-hanging-fruit analysis* finds out those products/services which are easiest reachable and are most business efficient
- ▶ *Eisenhower urgency analysis* finds out, how important or urgent the problems are for the customer. Helps to derive the *business opportunity list*

12

Market and Competitor Analysis

- ▶ A simple market analysis prioritizes the BOL with the chances in the target markets.
- ▶ *Killer-App analysis* finds out those products/services which are very attractive
- ▶ *BCB-Box analysis* finds out "cash cows" and "stars"

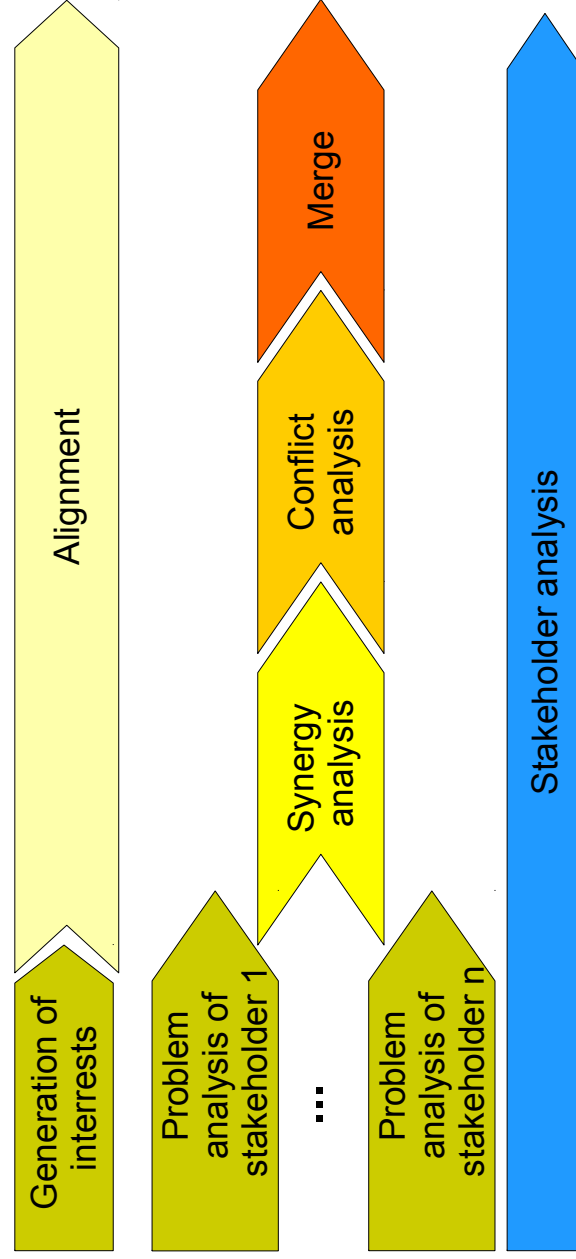

13

Stakeholder Analysis in Innovation Engineering

13

- ▶ Also stakeholder analysis relies on aspect-oriented problem analysis.
- ▶ Here, the concerns (SWOT, UCEW, or Maslow) can be used to find **synergies and conflicts**. From these, a **merge** of the problem analysis result must be achieved

Strategic Analysis

14

- ▶ For Start-Ups
 - Do a VPA with NABC
 - Conduct AOPA with SWOT-BPOPP
 - Conduct a AOEa with UCEW-BPOPP
 - Do a Stakeholder analysis.
 - It will bring out new ideas for business and sort out conflicts between stakeholders.
 - Then do a business opportunity analysis for “low hanging fruits”
- ▶ For strategic project and product managers:
 - Do a regular aspect-oriented problem analysis for your markets.
 - After a certain time, re-check the success analysis.
- ▶ Companies entering new markets:
 - Identify in a business opportunity analysis with a KillerApp analysis the “Stars” and “KillerApps”.
 - Avoid GoodJohns and TechnicalGoldenApps.

74.2.2 Business Cases (Geschäftsfall, -szenario)

15

A **Business Case (Geschäftsfall, Geschäftszenario)** plans the economic cost and benefit of a business opportunity, as well as the time of Return-Of-Investment (ROI, Wirtschaftlichkeit). [Wikipedia]

- ▶ Business Cases are derived from the Top-Level Business Opportunities
- ▶ Synonyms:
 - Kosten-Nutzen-Analyse
 - Wirtschaftlichkeitsrechnung
 - Renditerrechnung
 - Investitionsrechnung
- ▶ Without ROI analysis there is no investment

A **business case** captures the reasoning for initiating a project or task. Whenever resources are consumed, they should be in support of a specific business need.

74.3 Technology Transfer

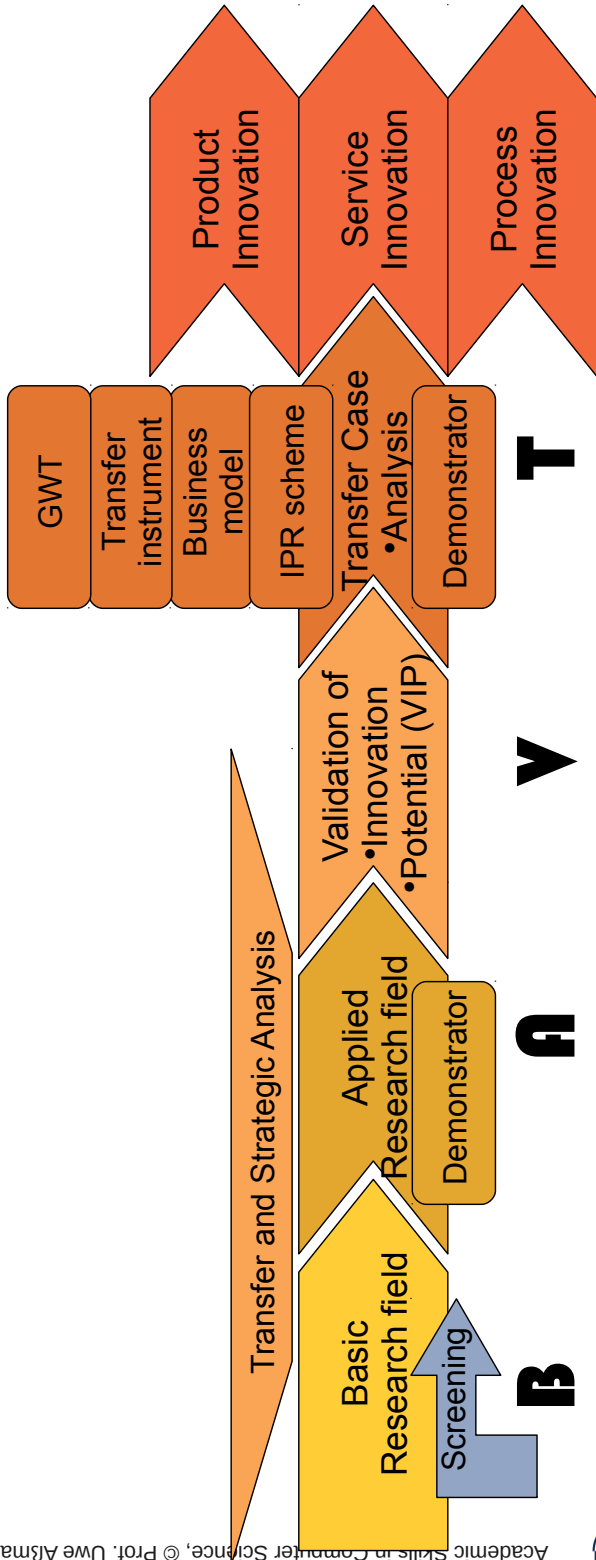

19

- How to organize transfer projects from which products can be commercialized

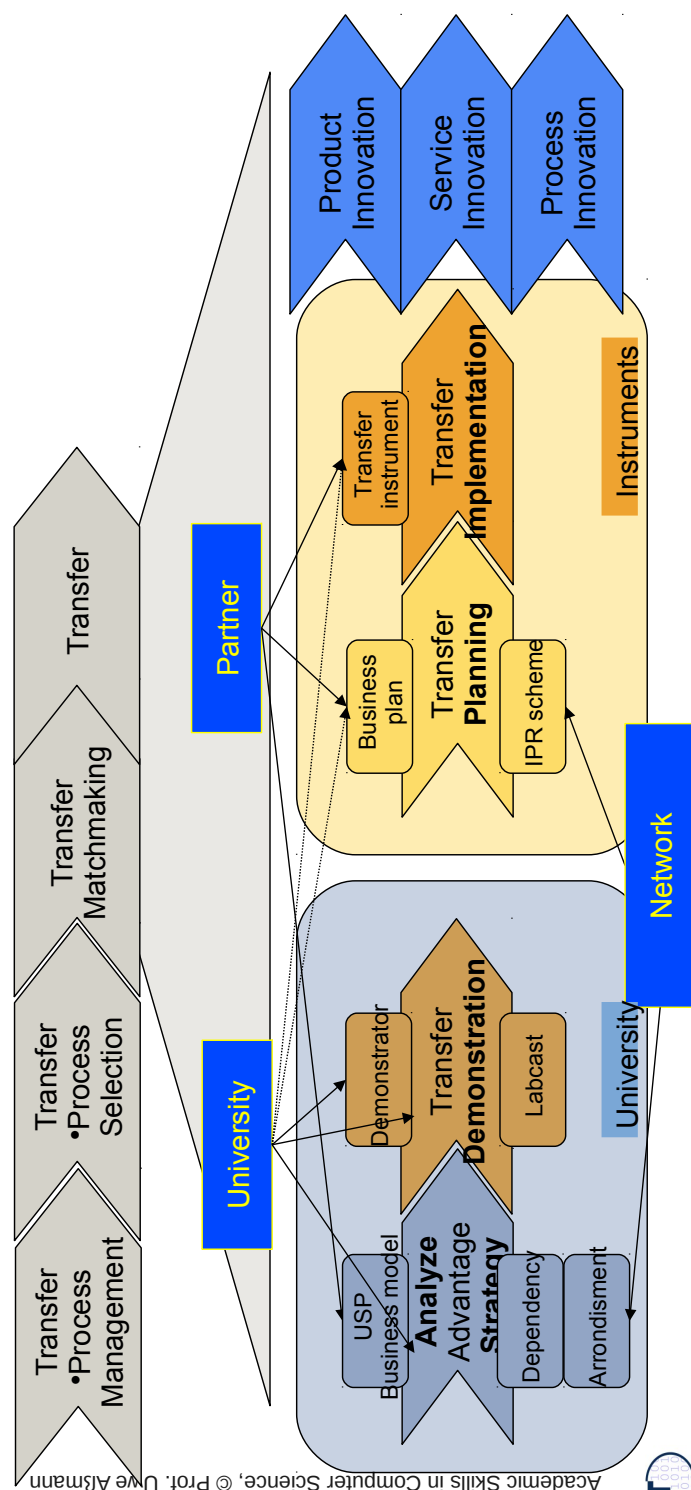

The Generic Transfer Process

- Transfer fields must be *matchmade* with applied and basic research fields
- So that a concrete transfer process can be installed

74.3.1. Push Technology Transfer Process

- **Push technology transfer process** operates in **phases** in concert with several partners.
- Companies are searched who realize innovation.

74.3.2. Specific Push Transfer Processes

22

Academic Skills in Computer Science, © Prof. Uwe Alßmann

74.3.2.1. Push Transfer Process with VIP

23

- VIP is a transfer instrument of BMBF
- www.validation-innovationspotential.de

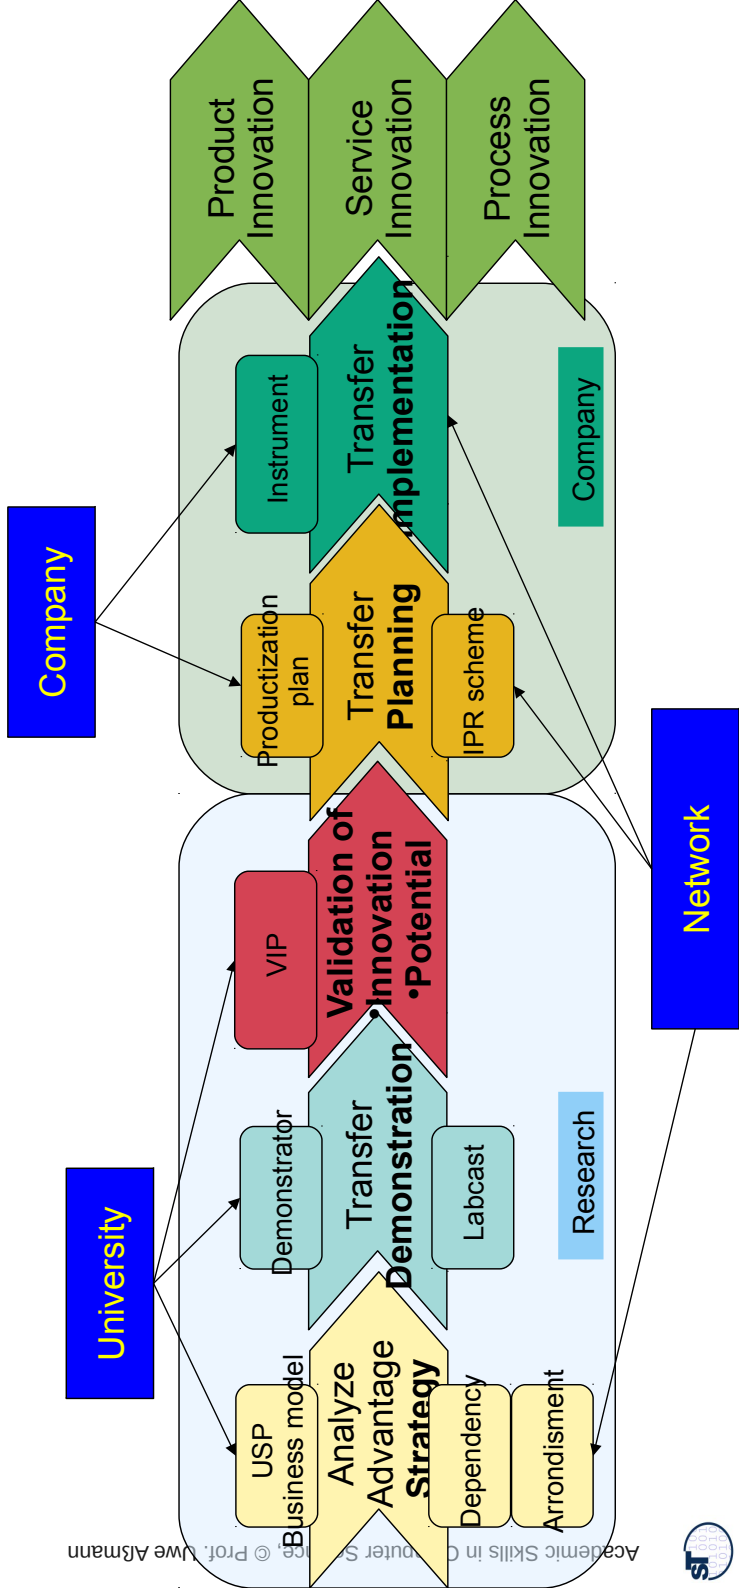

Academic Skills in Computer Science, © Prof. Uwe Alßmann

Push Transfer Process with VIP

24

- University prepares transfer with VIP project; company waits

VIP Unique Selling Points for Software Machine Tools

25

- ▶ For a Software Machine Tool (Software-Werkzeugmaschine) the VIP instrument can deliver new application domains and business opportunities
- ▶ Matrix of domain-specific use cases

Tool Use Cases	Domain 1	Domain 2	Domain 3
Function A		Customer a	Customer b
Function B		Customer a	Customer c
Function C			Customer c

74.3.2.2. Personal Transfer Process (PTP)

26

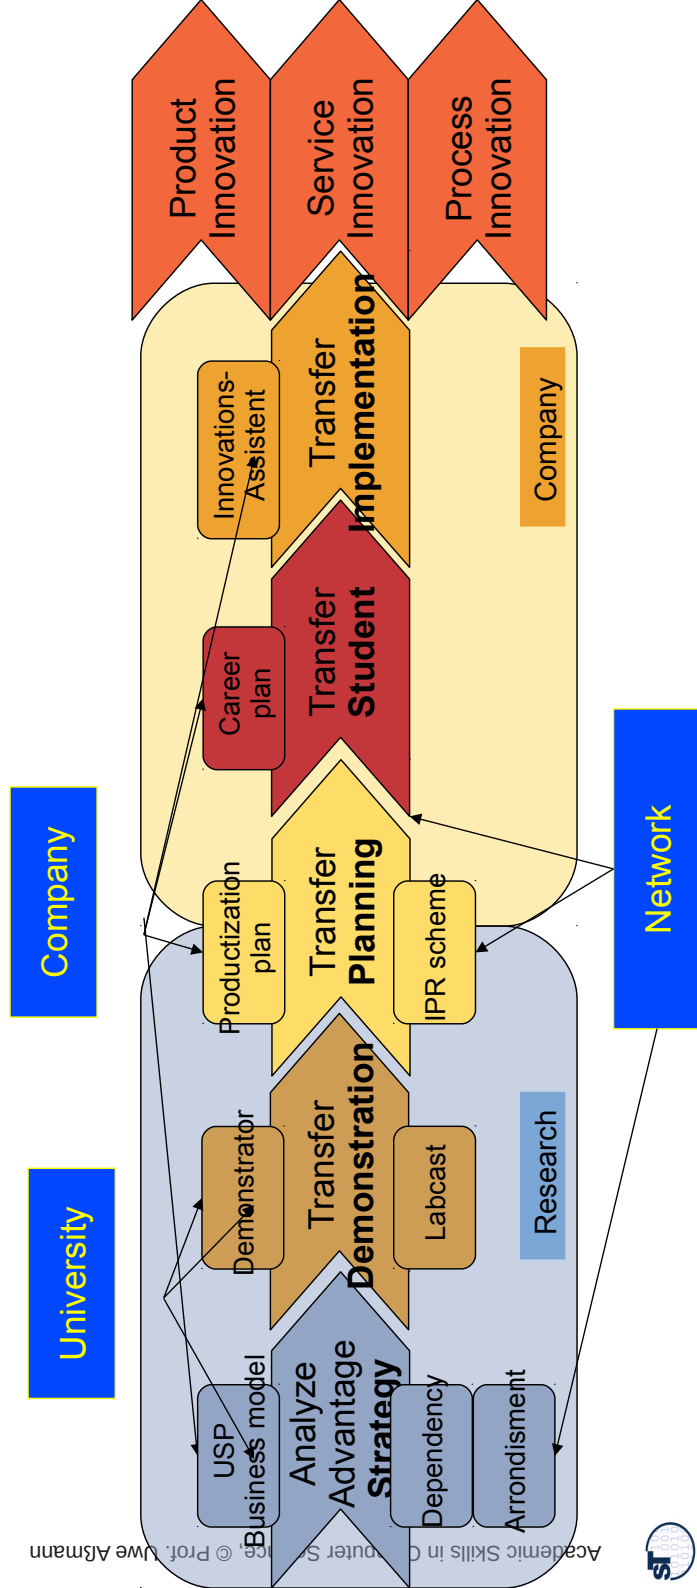

Academic Skills in Computer Science, © Prof. Uwe Alßmann

Personal Transfer Process

27

- **Personal transfer process** transfers students into existing business fields
- Light-weight process
- Advantage: extending a product

ESF Innovationsassistent

28

- ▶ After a master's thesis, a student can be employed 2 years for 50% in a small company, if he continues to transfer his master's thesis topic (or another research result) into the company
- ▶ High grant approval rate
- ▶ May be a chance for you?

74.4 Pull Transfer Processes

29

- "Pulling" means that industry pulls technology out of the University

74.4.1 Industriepromotion (Industrial PhD), z.B. Europäischer Sozial Fond ESF)

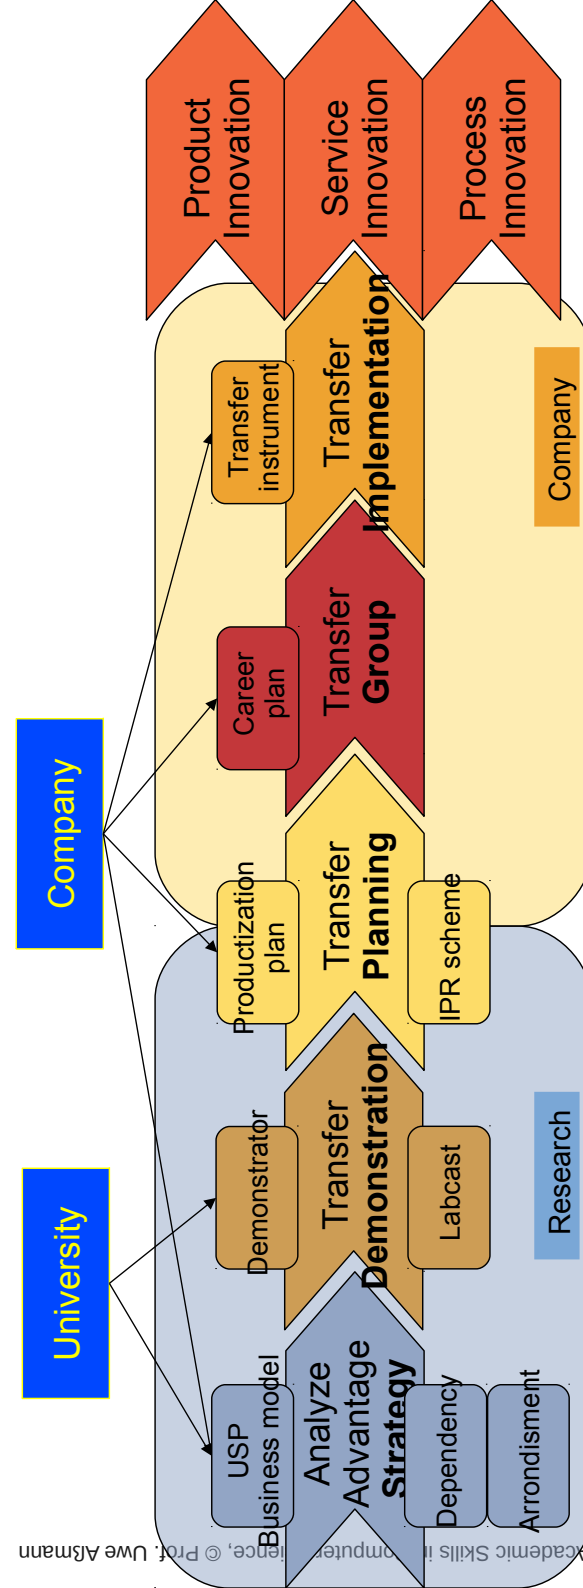

- ▶ PhD student gets a topic relevant for a company
 - works part time for the company
 - is paid 50% by the company
- ▶ Examples
 - Georg Püschel
 - Julia Schroeter

30

74.4.2 Pull Cell Transfer Process

- ▶ “Industry young researcher groups”
- ▶ Cell transfer process creates new fields for companies
- ▶ Transfers focussed junior research groups together with topic („Cell”)

31

74.4.3 Startup Founding with BMBF Exist

32

- ▶ BMBF exist“ is a stipend program of 1 year to derive a business plan for a startup
- ▶ A professor of the university becomes “Mentor“
- ▶ The startup agency “Dresden Exist“ mentors, too
 - and gives hints how to get the grant

74.4.4 Common Research Projects (Verbundprojekte)

33

- ▶ EU: Horizon 2020 mit Innovation process
- ▶ Saxonian instruments
 - Master's thesis with Innovationsassistent
 - InnoPrämie (10kEuro pro Jahr)
 - ESF Industriepromotion
 - Innovationsberatung für KMU
- ▶ BMWI
 - ZIM
- ▶ BMBF
 - KMU-initiativ
 - VIP

Beispiele erfolgreichen Transfers

Example: Software Production Center for Transfer

34

- Millersville Software Production Center Pennsylvania
<http://www.millersville.edu/spc/>
- The mission of the Software Production Center (SPC) at Millersville University is to provide emerging technology-focused entrepreneurs within the Central Pennsylvania region with assistance in advancing software products from concept to marketable product. The Center will accomplish this mission utilizing faculty expertise, the assistance of student interns from various disciplines, and support from community business leaders and technology experts. The Center will:
 - Serve regional economic and community development needs
 - Enhance the quality of instruction and learning resources available to students
 - Link the University community to regional business, government, and nonprofit resources

35

74.5 Coopetition and Collaborative Networks

74.5.1 Innovation Clusters aggregate Clustered (Colored) Value Chains

36

Academic Skills in Computer Science, © Prof. Uwe Alßmann

37

Innovation Clusters aggregate Colored Value Chains

- An innovation cluster aggregates a colored value chain with companies grouped to an application field
 - Product-structured colored value chain
 - Process-structured colored value chain

Academic Skills in C... © Prof. Uwe Alßmann

Creating Colored Value Chains

38

- Blueprints for Colored Value Chains should be asked in Delphi studies
 - Web community
 - Matchmaking system
- » Wie erzeugt man Benefit für alle? (Motivationssystem)

A Process to Create Innovation Clusters

39

- The process needs matchmaking of the cluster partners for the value chain
- **Cluster leader:** drums cluster together
 - Starting from a blueprint of a CVC
 - Does Delphi studies for innovation field
- Clustering IT-system
 - Simplifies Delphi studies
 - Fragebogenaktionen mit Review-System
 - Web 2.0 community a la itsax.de
- Cluster leader drums together a CVC for companies
 - Company as cluster leader
 - O4I as cluster leader

The End
