Hello everybody,

the binaries of the Advanced OCL Editor are available online. :-D

Please visit our editor's webpage: <http://squam.info/ocleditor/>

In the Download section you can find instructions, binaries and the Eclipse update link. We would be glad if you try our tool and comment on it. We have a bug tracking system hosted at: <http://code.google.com/p/ocllibeditor/issues/list>

Enjoy and hope to hear from you soon

Joanna
