

Prof. Dr. Frank J. Furrer

# «Safety and Security of Cyber-Physical Systems»

Hauptseminar Sommersemester 2023

Day 2: 22. May 2023

WWW.PHDCOMICS.COM

## Schedule Day 2

Name	Presentation	Feedback
Furrer, Frank J.: <i>Introduction</i>	Introduction 09:20 – 09:40	
Tom Felber	09:40 – 09:55	09:55 – 10:05
Franz Glöckner	10:05 – 10:20	10:20 – 10:30
Short Break	10:30 – 10:45	
Richard Müller	10:45 – 11:00	11:00 – 11:10
Tuan Anh Nguyen	11:10 -11:25	11:25 – 11:35
Furrer, Frank J.: <i>Final Comments</i>	11:35 - 12:40	

## Content

### Part 1

- Choice of Topics & Research Questions
- Paper Checklist
- Peer Reviews

### Part 2

- Presentations
- Feedback

### Part 4

- Work Plan
- Next Steps

### Part 3

- Final Words

## Research Questions

“A good research question is essential to guide your research paper, project or thesis. It pinpoints exactly what you want to find out and gives your work a clear focus and purpose”

*Shona McCombes, 2022*

<https://www.scribbr.com/research-process/research-questions/>

All research questions should be:

- **Focused** on a single problem or issue
- **Researchable** using primary and/or secondary sources
- **Feasible** to answer within the timeframe and practical constraints
- **Specific** enough to answer thoroughly
- **Complex** enough to develop the answer over the space of a paper or thesis
- **Relevant** to your field of study and/or society more broadly

<https://www.scribbr.com/research-process/research-questions/>

<http://katdaley.blogspot.com/2016/03/what-makes-good-research-question.html>

## Research Questions

- **Focused**
- **Researchable**
- **Feasible**
- **Specific**
- **Complex**
- **Relevant**

## Tom Felber

**Topic:** Boeing 737 Max Disaster:

**RQ1:** What exactly did happen? A timeline of events that led to the crashes

**RQ2:** Why did the accidents happen, which mistakes were made and which principles have been violated?

**RQ3:** Which improvements have been done since then?

for/to ... ?

- **Focused**
- **Researchable**
- **Feasible**
- **Specific**
- **Complex**
- **Relevant**

## Franz Glöckner

**Topic:** Bangladesh Bank Security Incident:

**RQ1:** How did the attack chain and exploited vulnerabilities contribute to the heist's impact?

**RQ2:** What defenses failed during the heist, and what post-incident enhancements were implemented?

**RQ3:** What lessons emerged from this incident, and how did they benefit the community?

- **Focused**
- **Researchable**
- **Feasible**
- **Specific**
- **Complex**
- **Relevant**

## Richard Müller

Topic: Observations on Flight Helios 522:

**RQ1**: Where can the chain of events that lead to the crash be broken?

**RQ2**: Which safety principles were implemented, and where did they fall flat?

**RQ3**: What improvements have since been made?

and ...

- **Focused**
- **Researchable**
- **Feasible**
- **Specific**
- **Complex**
- **Relevant**

Are we not more interested in which safety principles were NOT implemented?

Not specific and targetted enough

## Tuan Anh Nguyen

**Topic:** Ukraine Power Grid Attack (2015):

**RQ1:** Analyze the technical capabilities of the attackers, which weaknesses were taken advantage of and assess the damage caused

**RQ2:** Investigate the active vulnerabilities of the system and why the security at the time didn't work against the attack

**RQ3:** Inspect what security measures were enforced after the incident and how effective they were against future attacks (after 2015).

- **Focused**
- **Researchable**
- **Feasible**
- **Specific**
- **Complex**
- **Relevant**

## Content

### Part 1

- Choice of Topics & Research Questions
- Paper Checklist
- Peer Reviews

### Part 2

- Presentations
- Feedback

### Part 4

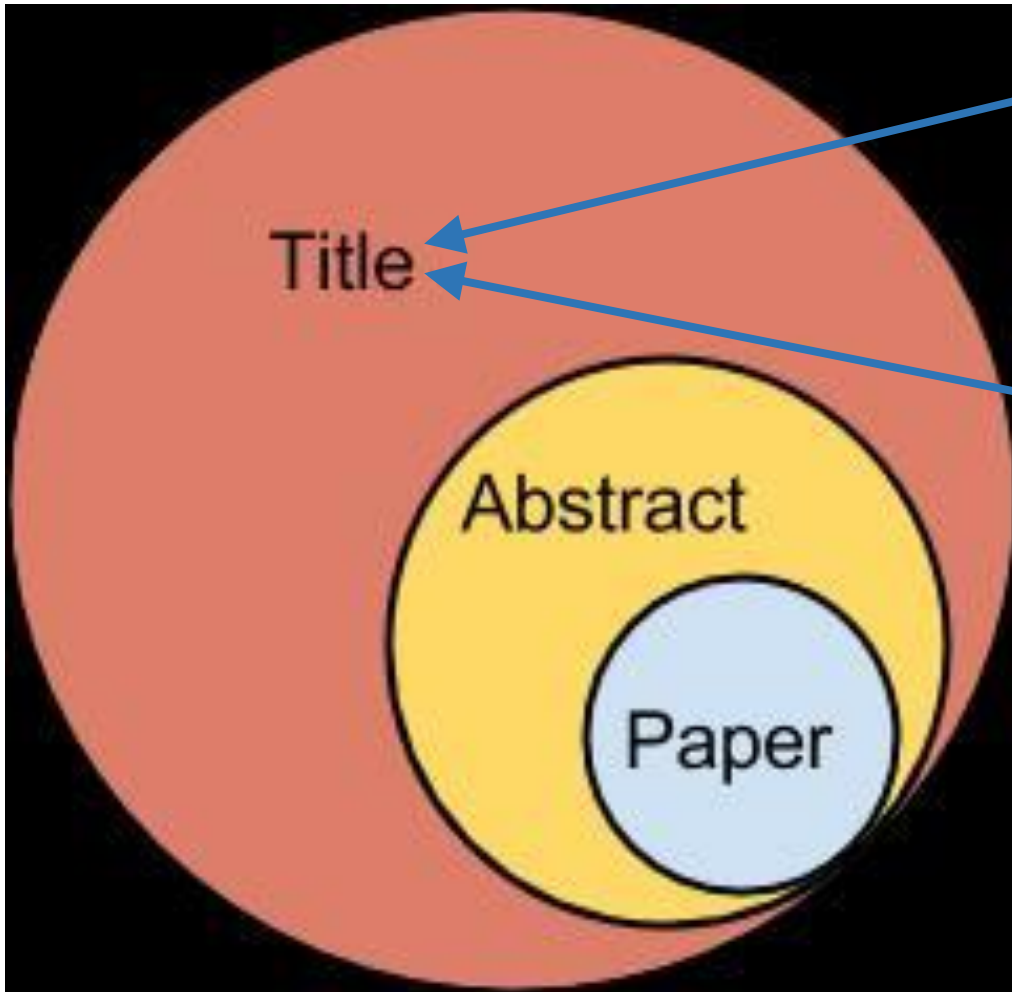

- Work Plan
- Next Steps

### Part 3

- Final Words

Title

Reader **Motivation** to read the Paper

The title must contain a **promise** to the reader

Which is my **learning benefit** if I invest the time to read the paper?

**HS 2022: Final Titles**

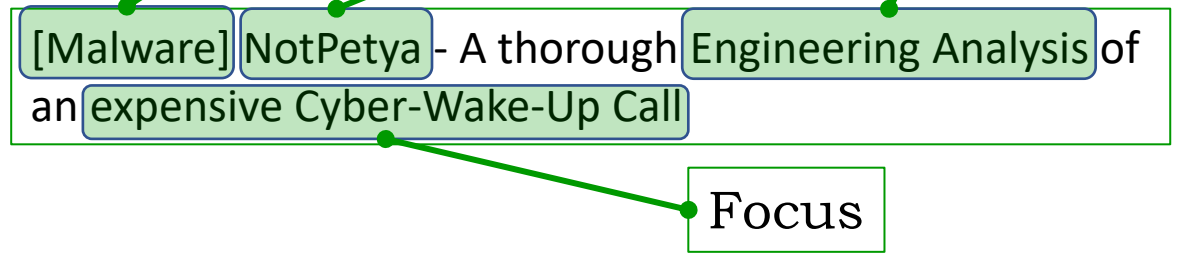

Title

Prefix ?

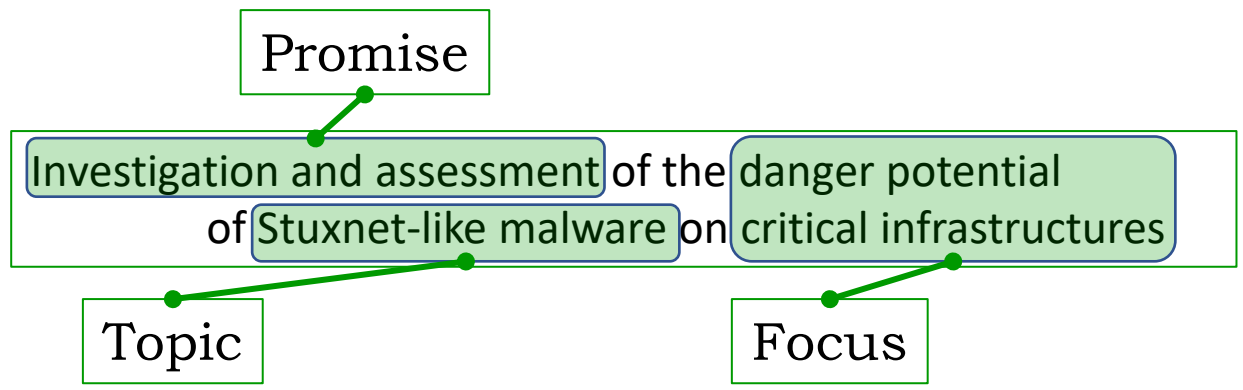

Topic

Promise

Leonard Wagner:  
"NotPetya – The most expensive wake-up call"

Tom Gneuss:  
Invisible worms infiltrating critical infrastructure

Johanna Bernholz:  
Autopilot- the unseen risk in our everyday life

Content

**Part 1**

- Choice of Topics & Research Questions
- Paper Checklist

**Part 2**

- Presentations
- Feedback

**Part 4**

- Work Plan
- Next Steps

**Part 3**

- Final Words

## Peer Reviews

Slide from Day 1

### Peer Review

Peer reviewer = Equal ranking, qualified, independent individual

- ✓ Reading & understanding the paper
- ✓ Pointing out weak or missing points & arguments
- ✓ Making suggestions for improvement

→ **Delivering a review report**

- Examine the importance of the research question(s) addressed in the manuscript (e.g., are objectives and justification clearly stated?).
- Assess the originality (contribution, addition of knowledge to scientific literature or field) of the manuscript.
- Clearly identify the strengths and weaknesses of the method described in the manuscript.
- Make specific useful comments on the writing of the manuscript (e.g., writing, organization, figures, etc.).
- Offer specific comments on the author's interpretation of the results and conclusions drawn from the results.

<https://www.elsevier.com/reviewers/how-to-review>

Please take reviewing seriously and invest sufficient time - It is an essential service to your peers

**All peer reviews were short, poor and did barely provide any constructive substance!**

Hello Tom,  
really engaging topic, and pretty recent too. I hadn't heard anything of the topic, despite the global nature of the problem.  
I have no complaints about the research questions.  
kind regards  
Richard

<https://www.liftenablement.com>

Hello Franz,  
you made a nice choice as a topic and I like the RQs that you made. They cover all the important parts of the accident. As another reviewer mentioned, it may be good to combine the RQs, so that there aren't too many.  
Kind Regards  
Tuan Anh Nguyen

**RQ1:** What are key requirements of a generic framework for protective shells in safety and security-critical cyber-physical systems to improve their trustworthiness by reducing the risks of failures and exploitations?

Die Frage enthält eine Antwort (requirement = trustworthiness, solution: reduce risks). Hier sehe ich 2 Wege: die Frage zielt auf eine konkrete Anforderung ab (How to increase the trustworthiness of safety and security-critical CPS? Oder die Frage ist, welche Anforderungen ein solches CPS haben soll: What are key requirements for s&s-critical CPS (e.g., verifyability, reliability, ...). Ich denke, dass die Vertrauenswürdigkeit die perfekte Qualität ist, die man angehen sollte. Also die erste Frage fände ich sinnvoller. Hier direkt wieder ein Literaturhinweis: Trust in adaptiven Systemen wurde unter anderem in einem großen Projekt namens OCTrust untersucht: <https://www.uni-augsburg.de/de/fakultaet/fai/isse/projects/octrust/>

OC steht hierbei für Organic Computing – einem Synonym für selbst-adaptive/-organisierte Systeme.

Hier wurden auch Metriken für Trust in SAS eingeführt. Diese würden sich wiederum hervorragend für die Evaluation der Arbeit eignen.

<https://www.pinterest.com>

Peer Reviews  
are not a nuisance,  
but an important building block  
of your career

- Improves paper or project
- Enhances the skills and knowledge of author(s)

### Why are peer reviews good for the reviewer(s)?

#### Academia:

- Leads to important contacts
- Generates visibility and recognition

#### Industry:

- Massively raises the visible value of the reviewer
- Leads to invitation to project groups

Importance of good reviewers: **Academia**

Feedback for Author Decision for Publisher

<http://science.spb.ru>

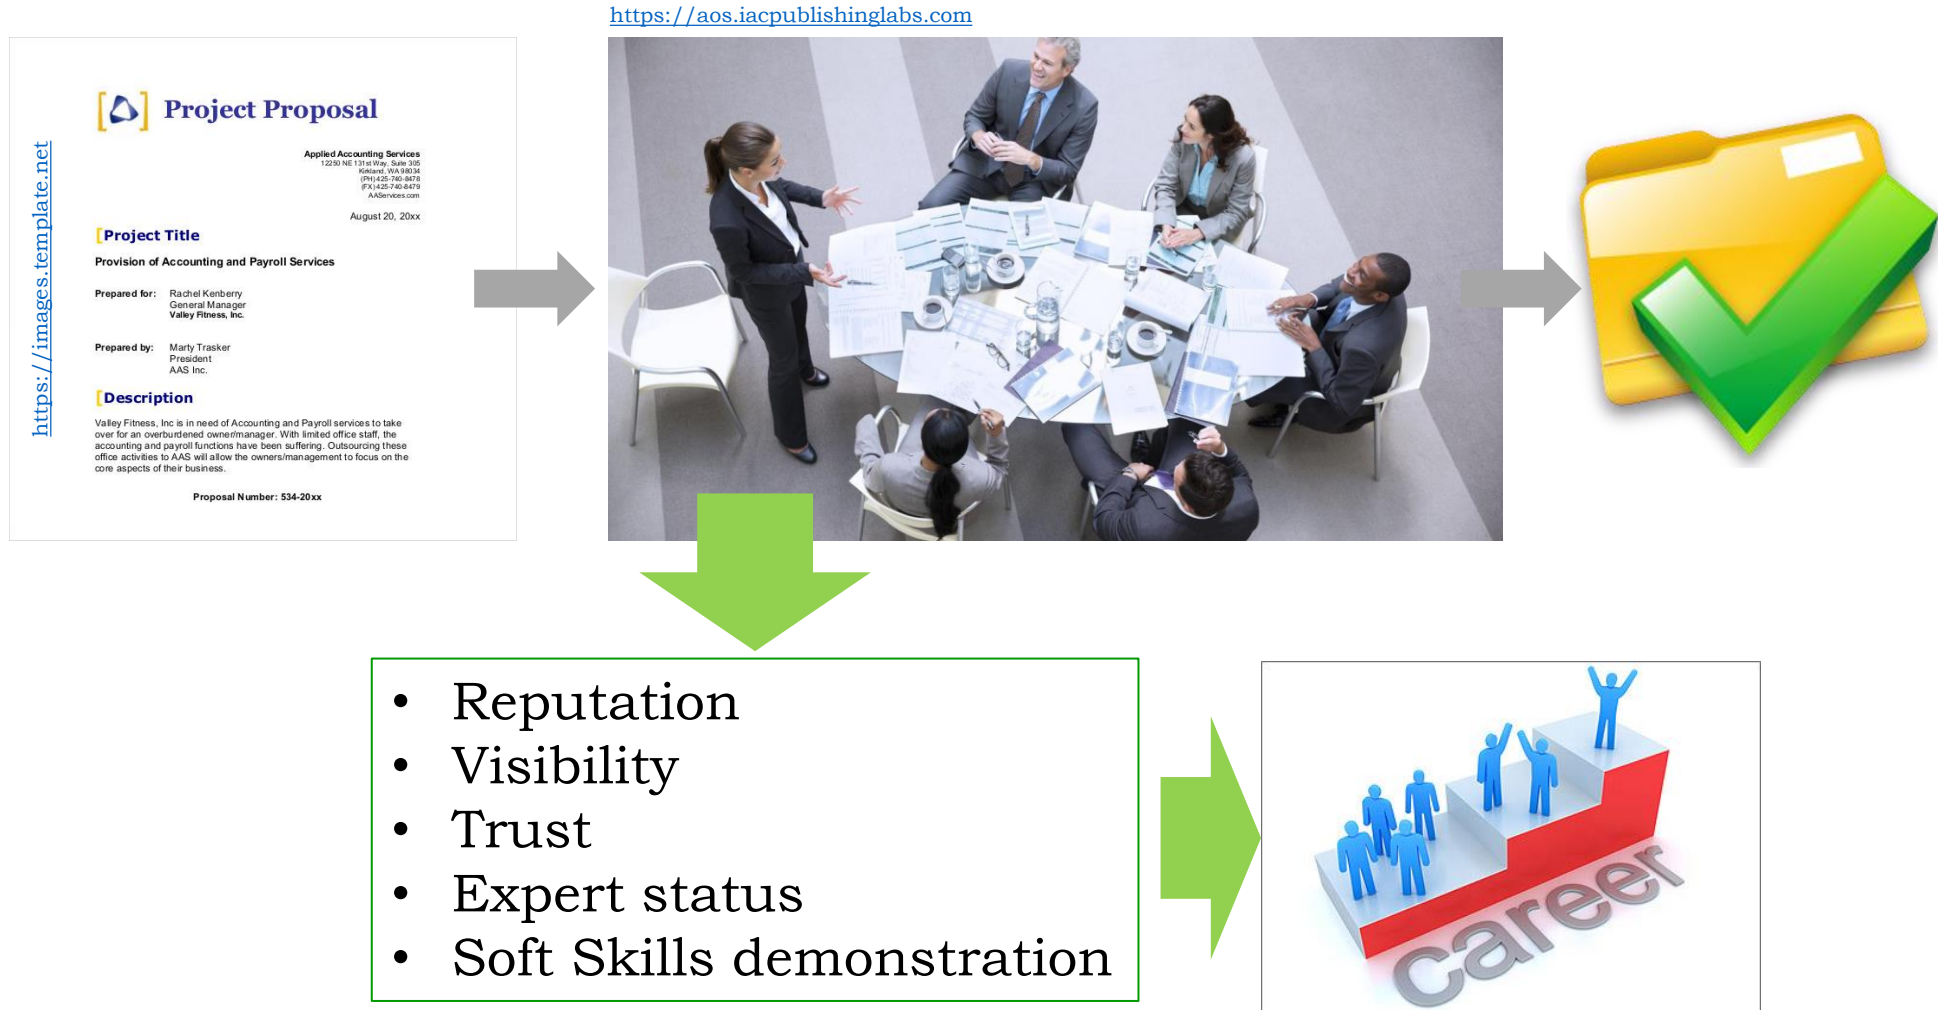

<http://data-mining.philippe-fournier-viger.com>

- Reputation
- Conference Program Committees
- Visibility
- Networking

Importance of good reviewers: **Industry**

Peer reviews should be taken very **seriously** – they are an important tool for your career  
- Both in *industry* and in *academia*

# What is the sure death of a good presentation ?

## No Solution:

- Talking faster
- Skipping slides
- Shorten explanations

**Time overrun !**

<http://www.wfs.org>

## Schedule Day 2

Name	Presentation	Feedback
Furrer, Frank J.: <i>Introduction</i>	Introduction 09:20 – 09:40	
Tom Felber	09:40 – 09:55	09:55 – 10:05
Franz Glöckner	10:05 – 10:20	10:20 – 10:30
Short Break	10:30 – 10:45	
Richard Müller	10:45 – 11:00	11:00 – 11:10
Tuan Anh Nguyen	11:10 -11:25	11:25 – 11:35
Furrer, Frank J.: <i>Final Comments</i>	11:35 - 12:40	

... the stage is yours!
